

INTELIAIR EXPANDS INSTALLATION NETWORK

Inteliair air movement control systems expand in the UK and Europe

The Inteliair network of installers and agents is growing. A-Mac Environmental Ltd in the North and East of Scotland, Durnbury Ltd in the East Anglian area, Ralton Engineering BV in Holland, Aero industriële afzuig- en filterinstallaties B.V also in Holland and Naer in Northern Spain can all now offer their customers energy cost savings of over 40%

These companies can install Inteliair on new or existing installations and will offer greater control and reduced costs with an average ROI of just over a year. This is for both dust and fume extraction systems in a huge range of industries. We are looking forward to working with our new agents and installers and will be welcoming them soon into our dedicated training facility to help them offer the best service to their markets.

If you are interested in becoming an installer or agent in your region please contact us via email agent@inteliair.co.uk
